**PressCom Electronics, L.L.C. Earns AS9100 Registration**

***Registration ensures printed circuit assemblies meet the highest quality standards of the aerospace and defense industry***

Mesa, Ariz., – PressCom Electronics, L.L.C., a high-mix, low- to medium-volume contract manufacturer of a broad spectrum of printed circuit board assemblies, announced today that it has achieved registration to the ISO 9001:2000 quality standard and to the AS9100:2004 B standard, which provides stringent quality management system criteria critical to the aerospace industry.

“Registration to the AS9100 standard demonstrates PressCom’s commitment to delivering quality products to its customers in the aerospace and defense industries,” said Rick Felkins, president and general manager of PressCom Electronics, L.L.C. “We’re very proud of this accomplishment and the teams who made it possible.”

Founded in 1982, PressCom Electronics, L.L.C. is a woman-owned small business that provides design, prototyping, assembly and full-service production of complex printed circuit board assemblies. PressCom Electronics, L.L.C. is headquartered in Mesa, Arizona.
